

### **Amendment(s) to the Claims**

The following listing of claims replaces all prior versions and listings of claims in the present application:

#### **Listing of Claims:**

Claim 1 (original): An injection-molded product comprising separate-member-fixing hooks each connected to an edge of its body via a thin hinge, said injection-molded product being formed by injecting a molten resin into a die comprising a pair of die plates, and said hooks extending from said edge substantially perpendicularly to a parting direction of said die in an as-molded state.

Claim 2 (currently amended): The injection-molded product according to claim 1, wherein each hook comprises a nail for being received in each hole of ~~said a~~ separate member to fix said separate member, said nail projecting from said hook substantially in parallel with a parting direction of said die in an as-molded state.

Claim 3 (currently amended): The injection-molded product according to claim 1, wherein each hook comprises a hole for receiving ~~each a~~ projection of ~~said a~~ separate member to fix said separate member, said hole penetrating through said hook substantially in parallel with a parting direction of said die in an as-molded state.

Claim 4 (currently amended): The injection-molded product according to ~~any one of~~ claims claim 1 to 3, wherein ~~said each~~ hook ~~comprises~~ includes one or more lateral projections engageable with holders formed in an edge of said body to keep said hook substantially in parallel with said body.

Claim 5 (currently amended): A bumper for an automobile comprising a body ~~comprising~~ having an opening for receiving a grille, and hooks for fixing said grille,

which are said hooks connected to an edge of said opening via a thin hinge, said bumper being formed by injecting a molten resin into a die comprising a pair of die plates, and said hooks extending inward from an edge of said opening substantially perpendicularly to a parting direction of said die in an as-molded state.

Claim 6 (currently amended): The bumper for an automobile according to claim 5, wherein said each hook ~~comprises~~ includes a nail for being received in each a hole of said grille to fix said grille, said nail projecting from said hook substantially in parallel with a parting direction of said die in an as-molded state.

Claim 7 (currently amended): The bumper for an automobile according to claim 5, wherein said each hook ~~comprises~~ includes a hole for receiving each a projection of said grille, said hole penetrating through said hook substantially in parallel with a parting direction of said die in an as-molded state.

Claim 8 (currently amended): The bumper for an automobile according to ~~any one of~~ claims claim 5 to 7, wherein said each hook ~~comprises~~ includes one or more lateral projections engageable with said holders formed in an edge of said body to keep said hook substantially in parallel with said body.

Claim 9 (new): The injection-molded product according to claim 2, wherein each hook includes one or more lateral projections engageable with holders formed in an edge of said body to keep said hook substantially in parallel with said body.

Claim 10 (new): The injection-molded product according to claim 3, wherein each hook includes one or more lateral projections engageable with holders formed in an edge of said body to keep said hook substantially in parallel with said body.

Claim 11 (new): The bumper for an automobile according to claim 6, wherein each hook includes one or more lateral projections engageable with holders formed in an edge of said body to keep said hook substantially in parallel with said body.

Claim 12 (new): The bumper for an automobile according to claim 7, wherein each hook includes one or more lateral projections engageable with holders formed in an edge of said body to keep said hook substantially in parallel with said body.
